

ENVIRONMENTAL AWARENESS SERIES Part I: Let's Keep Breathing Clean Air!

Video made possible by Education Programs at the
George H.W. Bush Presidential Library and Museum

The air we breathe is often taken for granted. In a rapidly changing economy, it is important for government to seek the best possible outcome for everyone. President George H.W. Bush's Clean Air Act of 1990 contributed to saving 160,000 lives by forcing the reduction in carbon emissions from cars and factories.

Come join us as we explore the Clean Air Act with a lesson, an activity about wing-spans, and a guided craft focusing on clouds. This video is S.T.E.A.M. based and student-centric.

This is the first of our Environmental Awareness Series. Upcoming topics include: The N.A. Wetlands Conservation Act, Wildlife Refuges, and the Antarctic Protection Act.

President Bush signs the Clean Air Act Amendments, East Room of the White House. November 15, 1990
