

ENVIRONMENTAL AWARENESS SERIES

Part 4: Protecting the Antarctic by President George H.W. Bush

*Video made possible by Education Programs at the
George H.W. Bush Presidential Library and Museum*

Antarctica is the coldest continent on Earth. Even so, it preserves and supports life. It is protected by the Antarctic Protection Act that President George H.W. Bush signed into law.

Come join us as we explore the Antarctic with a lesson, an activity about how animals stay warm, and a guided craft how to make ice paints with food coloring. This video is S.T.E.A.M. based and student-centric.

This is the fourth and final of our Environmental Awareness Series.

President Bush - 41st Administration
1989-1993
